ABOUT AXIALL

Axiall Corporation is a leading integrated chemicals and building products company. It was formed in January 2013 from the merger of Georgia Gulf Corporation and the chemicals business of PPG Industries. Ranking 564th on the Fortune list of largest U.S. companies, the combined company is a stronger and more sustainable and geared toward continued growth.

Louisiana is home to Axiall's two largest chemical manufacturing facilities (Lake Charles and Plaquemine), which employ more than 1,750 full-time workers.

Axiall operates more than 24 chemicals and building products manufacturing facilities in North America, where it is the third-largest chlor-alkali producer, the second-largest vinyl chloride monomer producer and the third-largest vinyl siding manufacturer.

Axiall's vision is to build a better future through applied chemistry. We are committed to operating our business in a socially and environmentally sustainable way that positively impacts people, products and the planet.
